teaching monks in the school used the teaching method focus on independent thinking character to students. The problem solution is to summarize the lesson and critical thinking of current situation. For the teaching and learning management as focus on research, the moral teaching monks lack of research knowledge due to majority of monks finished Dhamma education only. So, must have the knowledge development about research more to moral teaching monks. For the learning management that focus on project usage, the moral teaching monks allowed the students to participate for Buddhism project, had the promotion and support the students to have the competition in many places and got many rewards. The teaching and learning management that focus on local wisdom, the moral teaching monks used the temple as the teaching management center by inviting the local wisdom teachers to help for teaching.

2. The concept for integration of Buddhadhamma for teaching and learning management of moral teaching monks in secondary school of Chonburi province, found that had used the concept of management by total quality management of Deming such as 1) the step of planning 2) the step for planning into practice step 3) the step of examination and evaluation 4) the step of standard improvement, to use the teaching and learning management to match with the teaching and learning management as child center, the teaching and learning management as focus on research, the learning management that focus on project usage, the teaching and learning management that focus on local wisdom and outdoor teaching. For the Buddhadhamma is used integrated in teaching and learning management of moral teaching monks which will help the teacher for good teaching management and better learning student are Trisikkha such as precept, precept keeping practice, rule, regulation and discipline, concentration, breath practice, calm mind, wisdom, consideration, solution, development, application, improvement and creative thinking for getting the desired characteristics are Chanda(aspiration) is the work and learning satisfaction, Viriya (energy) is to work hard and get the success, Citta (thoughtfulness)is to pay attention in the work and education, Vimangsa(investigation) is to revise the mistakes and solve the problems.

3. The procedure for integration of Buddhadhamma for teaching and learning management of moral teaching monks in secondary school of Chonburi province, consists of four steps such as 1) the step of planning: the moral teaching monk will set the teaching plan as the priority by studying the data, teaching and learning methods,
